

See It All. One Solution in the Cloud.

You need information to keep safe on the streets. Planning your policing strategies takes data. The right kind at the right place. But it's hard to pull what you need from different systems. And you need to see what's going on right now. In a way you can understand.

Analytics and Mapping: Together.

CrimeView Dashboard combines data and mapping to give you powerful analytical tools. Delivered as a single solution from the cloud. Bring together enhanced data services, mapping, and visualization technologies, to operate efficiently and effectively.

Achieve your objectives with customizable, easily accessible and visually relevant displays of measurable and achievable goals. Get actionable information you can use for proactive policing strategies. Community oriented, directed patrol. Intelligence led policing.

Seamless Access to Diverse Data.

CrimeView Dashboard aggregates data from disparate systems. Displays it as one seamless application. Incorporate calls for service, incidents, arrests, field interviews, and parolees in one operational map.

Your Roles, Your Responsibilities.

Configure your data your way. Create "Briefing Books" that can be based on role, organizational unit, geography, crime priority, or investigative units.

Timely Access to Data.

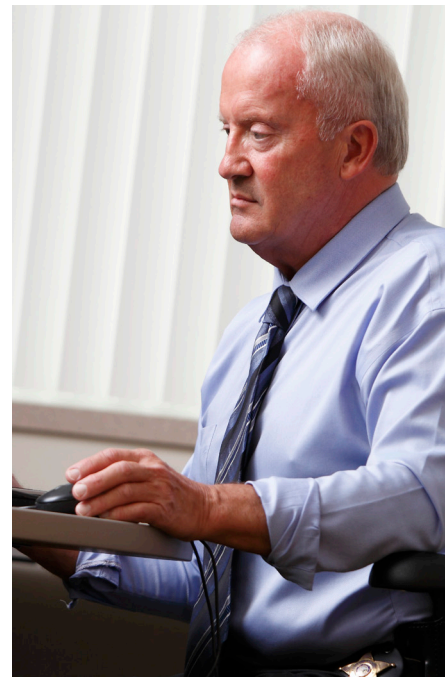

You need timely visualization that supports information-based decisions. Promotes officer safety, see trends, patterns, and behaviors. Analytics and mapping results are updated automatically multiple times a day in **CrimeView Dashboard**. Define your search criteria for searches that are focused, more effective.

Esri Integration.

CrimeView Dashboard is built on the Esri environment. The standard in many local government agencies.

Make It Happen.

Get a powerful analytics tool that will help you see, understand, and use your data. Contact our sales team for more information or for a demonstration of **Crimeview Dashboard**.
