

# IMC Cross Agency

## Inter-agency information sharing for enhanced public and officer safety

### Seamless Sharing

- Share and access other agencies' Master Names Indexes
- Mobile Interface allows Case Reports and Images to be shared
- Sharing of information fully controlled through Security rights

### Master Names and Index Sharing

Your agency's Master Names Index (MNI) grows exponentially with Cross Agency. Consider the power of being able to run Checks against a million entries – quickly, and with a single keystroke. For law enforcement, information is power and solves crimes. Your detective will be able to find out that a burglary suspect is also suspected in another town. Your patrol officer who stops a suspicious person near a school will know that the subject they are dealing with is a suspected sex offender in a nearby city. Criminal History is important, but Police Information solves crimes – whether or not there is a conviction on record

### Security

- Control what information you want to share and who you want to share it with
- Multi-levels of Security to control and restrict case access (Juvenile, Sex, Drugs, etc)
- Limit sharing by specific agency
- Logging to show who accessed which cases or persons from where

### Case Reports

- Detailed Case Reports accessible in the field including Open Activity, Gun Permits, Vehicle Ownership, Known Associates, Body Markings, and Arrest History
- Full Case Reports can be viewed in the field

### Checks and Extended Checks

- Run Person Checks against all agencies involved
- Run Extended Checks to build profiles based on multiple criteria (Height, Weight, Age, Gang, Tattoo, Marks, Hair, Sex Offender, etc)

### Vehicle Query

- Run Vehicle checks against all participating agencies based on multiple criteria (Plate, Plate Type, Year, Make, Model, Color, State, etc)
- Run Boat checks against all participating agencies based on multiple criteria (Make, Model, Hull Serial Number, Brand, Type, Coast Guard Number, Engine Type, etc)
- Checks can be run against Master Names or Dispatch call information

### Site Query

- Fire and First Responders can share and access full detailed Site information for Mutual Aid or multiple-

agency emergency responses

- Site particulars, HAZMAT Data – Response Plans and Areas, Fire Hydrants, Utility Cutoffs, Fire Response Plans, Water Systems, Fire Permits, Violations and inspection History all available in real-time
