

IMC Fire RMS

Superior Fire Protection Services and Operational Management

Seamless Integration & Migration

- Fully Integrated with other IMC products including IMC CAD
- Automatic backfill of apparatus and personnel in NIFRS Incident with IMC CAD
- Field Based Reporting looks and works the same as desktop version, no re-training of your personnel
- Can also function stand-alone to meet NFIRS requirements

NFIRS 5

- NIFRS Incident Reporting with intuitive forms-based interface that matches NIFRS forms
- Fire Incidents complete with Images, Attachments and Narratives
- Narratives can be copied from one Incident to another
- Easy Search for prior Incidents
- Comprehensive NIFRS validation to correct errors easily
- Geographic database for complete and accurate street references

Case Management

- Manage Incident reports with Assignment, Follow-Up, and Approval

Inspections

- Schedule and initiate inspections, inspection reports, violations and recommendations, customizable entry, department forms, letters, and checklists

Hydrants

- Track Hydrant locations and inspections for advanced planning

Complaints

- Track business, resident, or vendor complaints

Violations

- Manage Violations with a user-defined database of federal, state, and local regulations, plan and resolution tracking, and location history

Pre-Planning

- Detailed Pre-Plans on any structure or location in your town
- Track structure information, evacuation plans, hazardous waste areas, permits issued, inspections
- CAD and Mobile has access to see complete pre-plans

Permits

- Print permit certificates, receipts and conditions, automates renewal process, tracks vendors, employees, and licenses - customize entry forms and track fees

Fire Journal

- Fire Journal tracks daily Notes Log by station, truck, or personnel
- User-definable codes for category entries

Fire Calendar

- Calendar provides quick snapshot of Dispatch calls, Notes, Incidents, Inspection, Complaints, Violations, Permits, Hydrant Inspections, Maintenance and more. See what is going on in your station at a glance.

Apparatus Management

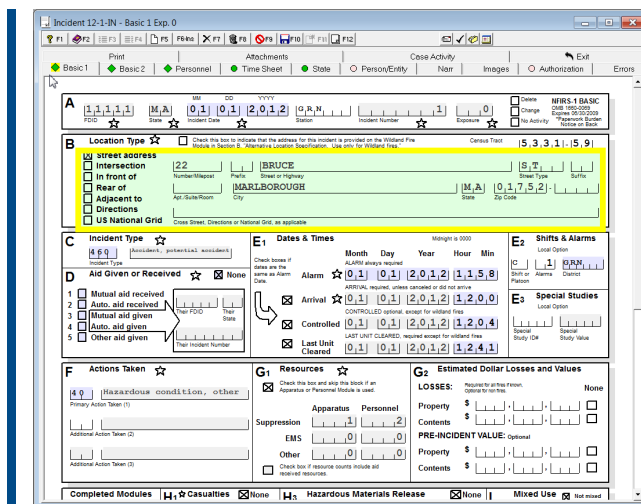

- Track fleet inspections, repairs, maintenance and costs based on NFPA® standards

Analysis

- 165 tabular and 152 graphical NFIRS analysis reports
- Incident Summary Analysis and Incident Assignment Analysis
- Analysis reports for Inspections, Violations, Permits and Attendance

Administrative

- Record Attendance and Apparatus Assignments
- Track Time Off

Recommended Options

- IMC CAD
