

Track It All. Every Inmate. Every Detail.

Chances are good that processing new inmates has you re-entering their data in at least a couple of different places. After booking, the information bottleneck gets worse. Head counts on a clipboard. Paper printouts of disciplinary action reports. Don't forget the stack of court transport request sheets on the desk. Digging for data slows you down. You're spending way too much time tracking all the details.

Book Faster, Book Smarter.

Zuercher Jail makes booking more efficient, with an easy-to use, configurable booking wizard that follows your existing booking procedure. Speed up your process with key data prepopulated from past bookings. Pull in data from arrest reports and warrants.

Review and update any history, alerts, or medical records from previous stays at your facility. Know when you need to separate an inmate from a rival gang member.

Zuercher Jail can be integrated with barcoded inmate wristbands, biometric systems, and signature pads. Integrate your system with other correction software, you already use: AFIS livescan, commissary systems, inmate phone, video visitation, victim notification, and more.

Beyond Booking.

Schedule inmate activities, medical appointments, and visitation. Set up schedules for weekend sentences. Track time served. And days yet to serve. Get notified when inmates are due to check in or check out. Do it all, easily, without having to re-enter booking data.

Record inmate movement using individual or bulk actions. Track meals. Med passes. Bond payments. Mail. Bank balances. Attach electronic incident reports and disciplinary action forms to inmate records. Supervisors can review, approve, make notes. Use fine-grained permissions to control who sees what.

Classification Made Simple.

Create multiple assessment forms for classifying inmates at various stages of their stay. Want a questionnaire or a decision tree format? You choose. **Zuercher Jail** provides relevant incident, disciplinary, and charge history, helping your officers calculate a classification level. Classifications factor into future cell recommendations.

Automate Your Tasks: Get Reminders.

Create event-based tasks. Notifications that make sense for administrators and staff. Get an alert when a jail incident reports awaits your approval. Assign a cell transfer task to an officer automatically when an inmate gets a disciplinary lockdown restriction. Does the court officer need a list of inmates scheduled for court today? Configure the system to email it to him daily. Or create a custom dashboard part, and he'll see it immediately.

See the Big Picture.

Make sense out of all the daily action. Know where your inmates are at any given time. And where they should be. Create as many shift logs as you need to track anything you want. Streamline head counts and cell checks. Plan everything you need to handle inmate classes and work shifts, from schedules to rosters to waiting lists. Get a handle on your transportation scheduling and costs.

Track inmate funds and expenses. Integrate with Zuercher Financial for full inmate banking capabilities, and generate invoices for other agencies you house inmates for. Set up custom reports to get the data you need. Analyze trends. Send daily booking reports. Dig into annual population stats. Whatever you need.

Make It Happen.

Get ready for a jail management solution that will enable you to keep on top of everything that happens in your facility. Contact our sales team for information or a demonstration of **Zuercher Jail**.

Core Features

“WHEN AN INMATE
COMES IN, IT’S
EFFICIENT, QUICK AND
CONCLUSIVE.

THERE IS A TON
OF INFORMATION
AVAILABLE IN A SHORT
SPAN OF TIME.”
