

Full RMS Power. On the Move.

Your work is out there. On every call. At the side of the road. But with most systems, the information you need is at the office. You have to wait for a call back from dispatch. In the meantime, you're losing details. Or sitting at your desk instead of hitting the street. It's a pain.

Same Look, Same Feel: Same System.

Zuercher Mobile Records gives you the full Zuercher software experience without the desktop. It looks the same. Works the same. Connects to your complete Zuercher Records system, but is optimized for your patrol car laptop. There's no learning a new system. You already know it.

Do everything you normally do in the office. Without going back. File case reports, view and update incident, arrest, property, or evidence records. There's no uploading or downloading cases. No reconciling to your system. You have the power of Zuercher Records at your fingertips. One

application. One database Wherever you are.

Ditch The Time Lag.

Don't waste time re-entering data. Call for service data is pre-populated into your case report. Enter details before you forget. Everyone working a case can add information, from multiple locations. At the same time.

Real time reports means that everyone has the data faster. No waiting until the end of the shift to write the report. Supervisors can approve or kick back a case before shift change. Automatic e-mail or text notifications can alert command staff and public information officers right away.

Information Keeps You Safe.

See alerts now. Respond to a situation with the details you need. From your patrol car, silently and quickly search for background history about a person, address, or vehicle. Do your own NCIC searches in the field. Pull that information into your reports and forms on the move. It's all there.

Make It Happen.

Get ready for a mobile records system that takes your records where you need it: in the field. Contact our sales team for information or a demonstration of **Zuercher Mobile Records**.
